Article 9 – Timing

The timing will be done by a timekeeper using an electronic timing system. All participants will be given an electronic chip (attached to the back of the bib and which must not be removed, cut out or modified) which will be automatically initialised at the start line, and which will be used to check the regularity of the race at various points on the course. A competitor who does not follow the entire route of the event cannot be classified at the finish.

The bib must be fully legible and worn at the front during the race.

The data of the chips are collected and processed by the timekeeper, who will transmit to the Geneva Marathon Association and OC SPORT SUISSE Sàrl the results for the classification. All complaints can be made until 1 week after the date of the event to the organiser, after this period, no modification will be made. Complaints will only be processed if a gpx track is valid. The timekeeper may not accept the time change request if it does not seem valid.

The courses (except for junior races) are officially measured and approved for all races and championships in Switzerland.

Runners who are caught by the broom wagon will have their bibs withdrawn and will no longer be part of the race. The safety device will be progressively lifted, and the competitors will have to respect the usual road signs and use the pavements to finish the race. Furthermore, after this time, the organisation will no longer provide refreshments or medical assistance.

The time limits for each race are as follows:

The ranking will be established using these times. A classification by age category will also be established. It is reminded that controls will be carried out during the event to ensure perfect conditions of regularity of the race.
